***The price list contains prices for health care services that are provided to patients who have a contractual relationship with a health insurance company, but require:***

*2.1 to provide a service at his own request,*

*2.2 to provide a service that is not covered by public health insurance,*

*2.3 to provide above-standard health care, related above-standard services, or the use of materials or aids that are not included in basic health care and are therefore not covered by public health insurance,*

*2.4 to provide interventions that are not covered by the health insurance company,*

*2.5 to provide services that are beyond the scope of the reimbursed services or are only partially or limited, covered by the health insurance company.*

1) The above-standard single room is equipped with its own spacious bathroom (toilet, shower), a pull-out chair with the possibility of an extra bed for the accompanying person (with the possibility of free accommodation for 4 nights including meals). The equipment includes inert and bactericidal shading curtains, a comfortable wardrobe and table, a large-screen TV and unlimited WiFi connection (activation via QR code). The room is equipped with individually controllable air conditioning, while cooling is provided by a system of radiant panels for the highest cooling comfort of the patient. In addition, the south, east and west facing rooms are complemented by exterior shading to limit overheating of the room. The above-standard service also includes a personal approach and accompaniment of patients by a receptionist or assistant, which ensures comfort and support throughout hospitalization. For patients who subsequently undergo outpatient treatment, therapy in a day care center or one-day health care, there is also a hospital dormitory in the immediate vicinity of the main hospital building. The set of this non-medical care (services) represents a comprehensive package of above-standard conditions that combines privacy, comfort and individual support throughout the patient's hospitalization.
